High-level academic programmes delivered by the International Anti-Corruption Academy (IACA) on Combating Corruption and Building Integrity

Fourth course: Responsible and Ethical Use of Artificial Intelligence for Corruption Prevention, Detection, Prosecution, and Integrity Management

Do you want to understand how Artificial Intelligence (AI) and Generative AI (GenAI) can be used to prevent, detect, and investigate corruption while ensuring ethical and accountable governance? Are you ready to strengthen your capacity to apply AI tools responsibly in anti-corruption work without compromising legality, transparency, and human oversight?

This online course provides participants with a comprehensive understanding of how Artificial Intelligence (AI) and Generative AI (GenAI) can be applied to strengthen corruption prevention, detection, investigation, and prosecution, while ensuring ethical and accountable use. Through real-life case studies, practical exercises, and interactive discussions, participants will learn how to identify corruption risks, detect hidden patterns, and support evidence-based decision-making across the anti-corruption value chain. The course also builds capacity to govern, audit, procure, and oversee AI systems in line with EU standards, including the EU AI Act and OECD principles on AI governance. It promotes responsible use of AI by addressing risks related to bias, privacy, and due process, while enhancing institutional coordination and integrity management.

Learning Objectives

By the end of this course, participants should be able to:

- Understand core AI and GenAI concepts relevant to governance, auditing, and anti-corruption.
- Explain core principles of ethical and responsible AI and their relevance to anti-corruption and compliance environments
- Critically assess opportunities and risks of AI deployment in fraud detection, corruption risk management, and the rule of law.
- Interpret and apply key elements of global AI regulatory frameworks - EU AI Act, OECD AI Principles, and other international integrity standards.
- Design governance structures that balance innovation, accountability, and legal compliance
- Translate ethical AI principles into operational decision-making in both public and private sector contexts
- Strengthen institutional readiness for AI adoption, procurement, and oversight.

Dates and logistics

The course will be delivered in four (4) online sessions between 14 September and 9 October 2026[1], one session per week. Each session will last for 90 minutes. The online sessions' lecture time will be between 15:00 - 16.30.

Study materials will be available on the IACA learning platform as of the beginning of September 2026.

[1] The exact dates of the sessions within the specified period will be communicated to the selected participants at a later stage, in any case with sufficient notice before the start of the course.

Assessment

Each participant's learning outcome will be assessed through a quiz-based examination. The passing grade will be 80%. The final graded assessment quiz will be available on the IACA learning platform and must be completed by 9 October 2026. After successful completion of the training, the participants will receive a certificate of completion.

All participants will be required to submit their feedback/evaluation in an electronic format specified by IACA.

Who should attend?

Maximum 25 mid and senior-level public servants and professionals working in anti-corruption bodies, law enforcement bodies, the Financial Intelligence Office, public prosecution offices, courts, audit and oversight institutions, public procurement authorities, and other relevant public sector institutions involved in financial oversight, regulation, and accountability.

Participants should have a role and interest in preventing and detecting corruption, improving interagency cooperation, and applying international best practices and digital tools to enhance transparency and accountability.

English proficiency is required in order to attend the course.

How to apply

Expression of interest should be sent on the **application form/motivation letter in English language** (see annex) to sashenka.gramatova-ljuben@rolaw.mk by the **15 May 2026.** A short interview will be conducted with the shortlisted candidates to assess their English language proficiency.
